

# HAITI

SPRING • FY2022 • COUNTRY REPORT

**Your support is making a difference to farmers like Dieudonne. Thank you!**

## DIEUDONNE'S STORY

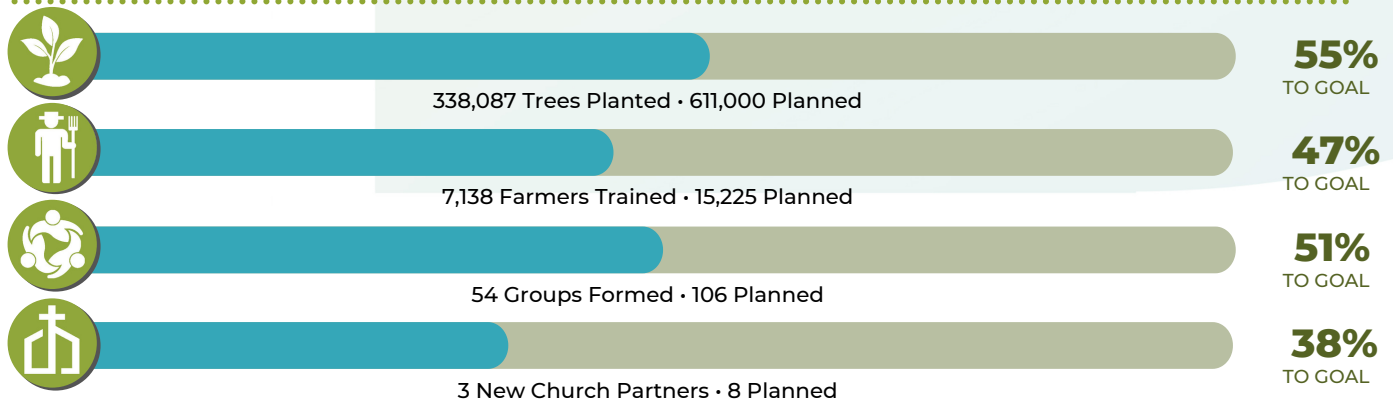

Before, we farmed without hope because our lands were so badly eroded. Uncertainty was a constant shadow in our lives, and most people only ate two meals a day. The younger generation realized that if they didn't get involved in making change today, their future could wind up compromised.

Thanks to our Purpose Groups, we have started to overcome uncertainty. We have learned to put aside our egos; we're more interested in training and motivating others. We started our own bank to save and borrow money.

People here will continue the techniques and activities they have learned because we're conscious of the advantages this partnership has brought to our community. We live, breathe, and eat better because we've implemented good farming practices, planted trees, and kept our community clean. We have better soil and yields, and the different vegetables we plant are good for our health. Because of those things, we can now eat three times a day.

## PROGRESS REPORT

\*as of Q2 FY2022

## HIGHLIGHT

Since our work began in Haiti 25 years ago, our partners have faced incredible political and environmental hardships. Nevertheless, they are empowered to do good in their communities. In fact, our Purpose Groups have generated over \$2.9 million in equity and planted over 5 million trees since 1997.
